-

PROJECTS

Style Supreme Shop — Full Stack E-commerce Web App: <https://style-supreme-shop.vercel.app/>

Tech Stack: React, TypeScript, Supabase, Vercel, GitHub, AI-assisted development

- Built a responsive e-commerce web application with product listing, cart, checkout, login/signup, admin panel, and order management.
- Integrated Supabase for authentication, database, products, orders, and user roles.
- Added product filters, search, cart drawer, order status management, and mobile responsive UI.
- Deployed the project using GitHub and Vercel with environment variable configuration.

AI Resume Analyzer — Full Stack Resume Analysis: <https://resume-analyzer-xi-gules.vercel.app/>

Tech Stack: React, Node.js, Express.js, OpenAI API, JavaScript, GitHub, Vercel

- Built a full stack AI-powered resume analyzer that helps users analyze resumes and get improvement suggestions.
 - Developed the frontend using React with a clean and responsive user interface.
 - Created backend APIs using Node.js and Express.js to handle resume analysis requests.
 - Integrated OpenAI API to generate resume feedback, skill suggestions, and improvement points.
 - Tested backend API using Postman and configured environment variables securely.
 - Deployed the project using GitHub and Vercel.
-

HOBBIES & INTERESTS

- Playing Chess to enhance strategic thinking.
- Playing outdoor games like: badminton, volley ball.
